DETAILED ACTION

Claim Objections

1. Claims 5-8 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot be dependent upon another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 5-8 have not been further treated on the merits.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Comtois et al (4727226).

Comtois et al discloses in the figures a modular switching device comprising a plurality of interconnected modules P1-P3 comprising a control device module, a switch device module and/or a pole cell module. The modules of the switching device being interconnected with a shaft 10 adapted to transfer a torque required for operating the switching device from one module to another module characterized in that each module comprises a shaft element 10 and in that the shaft is composed of directly interconnected shaft elements 10. Both ends of the shaft element of each module in the switching device are provided with a

connecting member for connecting to a shaft element of an adjacent module.

The connecting member is provided at a first end of the shaft element of each module is a male connecting member 14, and the connecting member provided at the second end is a female connecting member 16. The connecting members of the shaft element of at least one module are of a grooved shaft type.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Harper, Mrenna et al, Rys, Runyan et al, Leet et al, Innes et al, Casagrande et al, Castonguay et al, Rademacher et al, and McCoy teach various modular switching devices utilizing connecting members.
